Wholesale Price Supplement

Address and Make Remittance from this Supplement to
HARROLD'S PANSY GARDENS **BOX 29, GRANTS PASS, ORE.**

This mailing piece is a bit different than we have usually sent out at this time of year. It is being sent in this way because we want you to have this copy of our retail catalogue for your information. It does not take the place of our regular HARROLD'S REVIEW which will continue to come to you from time to time. These mailings are all intended to keep you informed of our service to the professional tradesman as well as to give information about the retail field as a guide for you. The next edition of the HARROLD'S REVIEW will be issued soon, just a bit later than this seasonal edition usually is and will be mailed to you as soon as issued. This supplement will be found to cover material of immediate interest and we hope that we may soon have an opportunity to be of service.

HARROLD'S PEDIGREED PANSIES For Profit

Continued strain improvement and breeding, coupled with increased publicity is constantly adding to the value of Harrold's Pedigreed Strain Pansies for you. Current seed harvest has been one of the largest in our history and quality is at the highest level. Further expansion in the publicity given this stock has also added to the public acquaintance and acceptance of these Harrold originations making them more valuable to you as a sales group.

During the past three months national gardening magazine editions exceeding 750,000 copies have carried display space relative to Harrold's Pedigreed Strain Pansies while at the same time circulation totaling over 3,500,000 copies of gardening sections in Sunday Newspapers have also carried similar display publicity. In the professional trade we maintain a mailing schedule of nearly 8,000 tradesmen and the print run on our last retail catalogue exceeded 30,000 copies. This means that a lot of people have used and heard about this quality line of stock. It also means that it is a line of stock offering unusual advantages to you both from a quality and sales standpoint and should prove more profitable than the run of the mill Pansies.

Consider your seasons needs now and order them while selections are complete. We will start shipping plants October Sixth and can ship during the entire winter except from December Fifth to January Fifth when we shut down our plant shipping because of the holidays. Shipping continues as late into the spring as our 1,250,000 plants will last which usually is not later than April first and sometimes not that late.

Order Pansy and Viola Plants Now! TODAY!! Novelty and Specialty Varieties

VARIETY	PRICE PER 100	1,000

CHINESE BLUE: NEW! Fine soft blue.	1.75	12.00
IMPROVED SCOTCH BEDDING MIXTURE: The newest bedding hybrids of many colors. Large.	1.50	10.00
KING HENRY: NEW! Violet blue, small yellow eye.	1.75	12.00
WHITE PERFECTION: Very large pure white.	1.50	10.00

QUANTITY AND SHIPPING RULES — PANSIES OR VIOLAS

Any item less than 250 of a variety will be charged for at the 100 rate. The 3,000 price may be applied where quoted to orders for 3,000 and more, providing no individual item is for less than 1,000. As shipping weight varies with the size of plants and moisture of soil at time of digging it is impossible to quote a delivered price. Our field grown plants from seedling field beds will range from 15 to 25 pounds per 1,000 with smaller quantities a bit heavier proportionately. Packing is with a minimum of soil in sphagnum moss and special wrappers, a method proven by over 35 years of use. **WE NEVER SUPPLY PLANTS IN FLATS.**

All perishable material travels at the responsibility of the transporting agency and the risk of the purchaser. Unless instructed differently all plants and bulbs will be sent by Railway Express, collect for transport charges. Parcel post shipment will be made by request **BUT FULL REMITTANCE COVERING POSTAGE MUST ACCOMPANY SUCH INSTRUCTIONS.** If postage remittance is inadequate we will forward Express anyway. If the postage remittance is excessive, refund will be made promptly. Don't ask for added plants in place of refund. Plants add weight; change postage thereby reducing overage — a vicious circle.

Prompt shipping schedules will be maintained within the limits of available stock, labor and weather. We expect to maintain good service as usual but please give us a break by ordering in good time to allow for any slight delay that might be unavoidable. We give every order the best possible attention but will adhere strictly to filling **ALL** orders in arrival rotation. Scheduling to avoid week end delays will be followed as nearly as is possible.

PANSY AND VIOLA SEEDS

We grow and stock one of the most complete lines of Pansy and Viola seeds in America. This collection of varieties we believe to be the finest obtainable and is the largest and most varied selection of strictly specialist grown seeds obtainable from a single specialty grower in America today. The line includes all the varieties we list in our plant list along with a number of others not included here. For full descriptions of this seed group as well as much cultural data see our Harrold's Review dated June 15th., 1947. A copy was mailed to you but in the event you have mislaid it we shall be glad to supply another on request. You'll find it pays to use our Harrold's Pedigreed Strains of Pansies and Viola seeds or plants.

Hardy Primula Polyanthus-Veris HARROLD'S PEDIGREED GIANTS

This new strain of Polyanthus-Veris Hybrids introduced by us six years ago is proving to be one of the most popular perennial items we have ever offered. Plants are compact and of robust habit with outstanding flower size and coloring. An ideal plant for shaded spots in the garden and gaining in popularity rapidly as the new, improved types become better known. We supply a complete cultural leaflet with each order free.

In our seed production fields plants bearing flower heads 8 inches across are not uncommon while individual florets often exceed 2 inches with flower stems over a foot long. Coloring is most brilliant and is being improved every season. Yellow, red, white and purple shades of striking hue along with the most unusual pastels of pink, blue, flame, bronze and multi-color types that are usually rare in this stock round out the finest color range to be found in this class of stock. Check the retail prices quoted on this stock in the retail list included herewith. Our stock is large but is being heavily booked so let us know what you will want in these as early as you can.

NOTE: Color blends from seed grown primula are subject to variation of the seed mixture due to germination variables in the various colors. We blend as nearly to an ideal mixture as possible but germination or cultural success you experience will affect the ultimate color blend obtained. Sorry but as yet we can't supply this outstanding stock in separate colors. These will have to come after our production catches up with the heavy demand.

SEEDLINGS AND TRANSPLANTED PLANTS

SEEDLINGS: From seed flats, \$5.00 per 100; \$42.50 per 1,000.
SPECIAL 5,000 for \$175.00.

OTHER PRIMULA SEEDS OFFERED IN OUR JUNE LIST.

Perennial Plants

One Year Old Field Grown

These plants are all one year old, field grown in sandy loam soil and will be ideal for planting now or in the spring for bloom next spring and summer. We suggest potting or planting in dirt-bands for spring sales. Our stocks of these are increased this season but we are quite sure that the selection will not remain complete throughout the season so order as early as possible..

VARIETY	PRICE PER 25	100	1,000
ALYSSUM — Madwort, Gold Dust or Basket of Gold.			
Saxatile Compactum: Golden yellow about 12".	\$1.25	\$4.00	\$.....

WALLFLOWER —			
Choice Double Flowered Mixed: Bright color blend.	1.50	5.00

Not Less Than 25 Of An Item Sold; 50 Of An Item At ½ The 100

SOUTHERN OREGON GROWN
GLADIOLUS BULBS

We offer here an unusually fine selection of Gladiolus. While our list is not as large in number of varieties as we have offered at times, it is much modernized and the stock is excellent. Prices are considerably adjusted this season but how long these prices will prevail can not be stated at this time. They are pre-harvest and based on field estimates of production. It may be found that they will have to be adjusted upward as harvesting is finished and it is certain we shall not be able to lower them this season.

Present indications on an industry wide basis are that there will be shortages in the first and second sizes of many varieties this season. The weather in much of the United States has not been good for these cultures and in many sections planting was done so late that the production of large size will be much below normal. Fortunately our season here has been reasonably good. For the reasons given and because of the probability of price advances before spring we believe you will find it to your advantage to anticipate your seasons needs now whether you place the order with us or elsewhere. We hope we may have the opportunity of serving you.

Fine Commercial

VARIETY	Color	Price Per 1,000	No. 1	No. 2	No. 3	No. 4

No order from this group for less than 25 of a variety or size where price is less than 50c each. Above that price 10 of a variety and size may be ordered.

Florist Bulbs

As has been our custom for many years, we offer here several groups of the finest bulbs grown in the Northwest. They are all stock that the Florist will find useful both as growing stock and for retail sales. The Lilies and Gladiolus are especially good this year and with price adjustments they are exceptionally attractive. While we are sold out of and unable to offer the larger sizes of Dutch Iris it will be found that the stock offered is most useful for outdoor cut flowers or for retail sales.

TERMS on bulbs are for delivery F.O.B. the office of the transport agency at Grants Pass, Oregon on a basis of cash with order. Offers are all made subject to crop and prior sale. In some cases it will facilitate covering your requirements if you give us permission to substitute one grade up or down or in rare cases to substitute variety in case ordered variety is sold. We will, however, follow your instructions in such matters. All orders will be shipped by express with transport charges collect unless other instructions are given. Postage in full must accompany any orders to be shipped by Parcel Post.

Croft Lily Bulbs

Forcing Quality

These Croft Lilies are the finest forcing Lily ever developed for pot forcing culture. They force easily in a reasonable temperature and are considered to be one of the safest varieties for meeting the Easter demand. Oregon grown Crofts are shorter growing than the same variety from the southern States and the bud count is high in relation to bulb size. It has been demonstrated by experience that under usual forcing conditions this stock develops the following average bud count when forced properly. Grade 6 to 7 inch 2 buds; 7 inch 3 to 4 buds; 7 to 8 inch 4 to 5 buds; 8 to 9 inch 6 buds; 9 to 10 inch 7 buds. We have had test plants give as high as 12 buds on 10 inch bulbs. November planting after four weeks of pre-cooling at 40 degrees should make Easter with proper culture.

Our stock is from the best strains here on the coast, tracing directly back to the original Croft planting. This is very important because of the amount of dabbling that has been done with these Lilies by people of no horticultural background resulting in much mixed stock being offered. This can not be fully appreciated without having had the experience of working in the growing district and seeing the many different types of bulbs and growers. While there are a lot of Lilies here on the coast this year the entire crop is not of good forcing quality.

PRICES FULL CASE LOTS — FORCING QUALITY

SIZE	No. per Case	Per Case
7 to 8 inch.	250	\$40.00

Not less than 12 of a size sold; 50 at the 100 and 500 at the 1,000 rate.

Croft Lilies In The Garden

In spite of the fact that these Lilies have been most widely known for pot culture and forcing they are a most desirable garden Lily and because they do not grow as high as most garden varieties there are many places where they are more usefull. We have personally experimented with them for this purpose and find them both hardy and easily grown.

They may be grown in any part of the United States, requiring protection only where sub-zero temperature without snow is to be expected. Even in these climates they require only a little mulch, about the same as is given to perennials.

The height of the plant in outdoor conditions will vary a good deal with the size of the bulb planted. Bulbs of less than 6 inch circumference will make a shorter plant — usually about 12 to 18 inches tall — while plants grown from 6 inch bulbs and larger will be from 15 to 24 inches in most good, fertile garden soils. The bloom count is much greater, size for size, compared with forced bulbs grown indoors. The 10 inch bulbs often give as many as 18 blooms under good outdoor conditions. Flowers are huge, possibly among the largest in the Lily family with trumpets often 10 inches long. Their pure white, waxy texture makes them most striking and the fragrance is very heavy. They bloom in the garden from late June until August, varying somewhat with the locality but the bloom are long lasting with a flowering period of 4 to 6 weeks.

We think that you will find these, as we have, a most desirable retail subject. Once your customers have tried them their friends are sure to want some too. They may be planted from October through February at any time the ground is not frozen or it is possibly better if planting after the end of November to pot into 6 inch pots and carry over the severe weather at a temperature just above freezing. The clean, large bulbs and bright foliage makes them an attractive retail item whether sold as dormant bulbs or started plants. Try them and you'll make them a part of your regular stock every year.

GARDEN PLANTING GRADE

SIZE	Price Per 12	25	100	1,000
4 to 5 inch.	\$1.50	\$2.50	\$ 8.00	\$ 50.00
5 to 6 inch.	2.00	3.00	10.00	65.00
6 to 7 inch.	2.50	3.75	12.00	80.00

BULBLET PROPAGATING STOCK

These are 2 to 4 inch circumference stem bulblets that are planted to produce the larger bulbs. After one year they are the garden grade offered above and the second years growth develops the forcing stock. In the more suitable climates some of these may bloom the first year.

PRICE OF THESE: \$6.00 per 100; \$55.00 per 1,000; 5,000 for \$250.00

CULTURE LEAFLETS SUPPLIED WITH THESE

Tulip Bulbs - American Grown

These were grown here in Oregon and from observation of their characteristics over the past several years when we had to depend on American grown stock, we feel confident that they will give just as good results as can be obtained from imported stock of the same size. The prices quoted are excellent values and the total quantity is moderately large. Early ordering is advisable.

TERMS OF SALE

PRICES — All prices are quoted on the basis of cash with order. Except where credit has been established and references checked no exception to this policy will be made. SEED can be sent C. O. D. and will be forwarded that way on request providing remittance of \$1.00 or 10%, whichever is greater, is made to guarantee handling costs. Strictly cash with order, collectable at U. S. par on all orders from outside the U. S. A. PLANTS and BULBS ARE NEVER sent out on a C. O. D. basis. ALL prices are subject to market changes without notice and all offers are subject to stock being available on receipt of your order.

REMITTANCE — May be by any of the usual commercial methods of transferring funds. The amount must be in United States money collectable at par for the full amount of the order. Service charges made by the paying bank to the payee must be remitted in the amount of such a check. Not all Banks make such a charge so you should determine if this charge will be made from your Banker. WE WILL NOT accept postage stamps as any part of the remittance for merchandise or postage. We use metered postage exclusively and stamps are a TOTAL LOSS to us.

TRANSPORTATION — SEEDS will be shipped by insured post prepaid. Free Air Mail delivery is available on seeds under conditions given in these catalogues. PLANTS and BULBS are delivered in so far as our delivery responsibility is concerned when shipment is accepted by the transporting agency at Grants Pass, Oregon. Thereafter all goods travel as the property of the purchaser. We recommend that all perishable material travel Railway Express and unless instructed differently all shipments will be made by that system with the transport charges collect.

OUR RESPONSIBILITY — In view of the reasonable wholesale prices quoted herein and the varied conditions under which this stock will be grown after leaving our care, it is manifestly impossible for us to guarantee in any manner, cultural or descriptive, the crop resulting from the use of this listed material. Ordering from this list will definitely be construed as your acceptance of these terms as set forth and it is understood that in all cases our liability shall be limited to the actual amount received on the purchase price of any material.

ALL OFFERS ARE MADE SUBJECT TO CROP AND PRIOR SALE
